PAPER –S 1 Education in Contemporary Indian Society

Unit- 1:- Challenges of contemporary Indian society , and education

Point -1 Diversity , inequality and deprivation: conceptual understanding and educational context

❖ Diversity

- Diversity means **difference** It happens
- In common parlance, when different types of things , animals and creatures live together, it is called diversity. That is, the co-existence of different types of creatures is diversity.
- , there is difference in language , food habits, lifestyle and festivals among people of different places . is called diversity
- If we look at the history of different regions, we will know how different cultural influences have contributed to shaping the lives and culture of the people living there . In this way, many regions become diverse due to their unique history. The way people adjust to different geographical conditions, i.e., live together, is called diversity .

❖ Types of diversity

1. Regional or geographic diversity – Variation by region
2. Linguistic Diversity , Variations by language
3. Religious diversity – Variations by religion
4. Racial diversity - Variation based on caste
5. Cultural Diversity - Diversity based on Civilization Culture
6. Species diversity - diversity based on species

❖ What is the importance of diversity ?

- Diversity is everywhere in our daily lives. It means experiencing traditions , learning new skills, and taking a broader and less selfish view of ourselves to create a more just

society. This is the importance of diversity: diversity gives our society a better chance to grow and develop.

❖ **Inequality ,**

- Inequality means that it **is** due to **the discrimination**
- Inequality It means discrimination based on caste , religion , language , cultural traditions, beliefs, gender etc.
- The state of not being equal is called inequality.

- ❖ **Meaning and concept of inequality** – meaning of inequality , individuals not getting equal opportunity for full development of their personality , getting privileges in the society , difference on the basis of birth , caste , race , occupation , religion , language , income and property and discrimination against humans on these basis And it is imposed by believing in the difference of high and low among the human group and maintaining social distance.

• **Note;-**

- At present, inequality is the biggest problem of the country. Social inequality , economic inequality , educational inequality , regional inequality and industrial inequality remain the biggest obstacles in making the country developed.
- **social inequality** Because of this, mutual love , brotherhood , humanity , manliness and morality are disappearing from the society today.
- **economic inequality** Because of this, the difference between the rich and the poor is being pointed out in the society today .
- The number of billionaires is increasing but the poor sections of society are standing at the same place and are

becoming poorer. And they are being looked upon with contempt in the society.

❖ **Types of inequality**

1. Gender inequality - discrimination on the basis of gender
2. Political inequality - discrimination on the basis of politics
3. social inequality - Discrimination on the basis of society
4. Economic inequality - discrimination based on money
5. Caste inequality - discrimination on the basis of caste
6. Rural-Urban Inequality - Discrimination on Rural - City Basis

❖ **Inequality affects our society**

1. The ill effects of inequality between Scheduled Castes and Non-Scheduled Castes are widely affecting our society.
2. Due to inequality , mutual love , brotherhood , humanity , humanness and morality are vanishing from the society
3. Due to inequality and personal selfishness, the society is being divided into castes and religions .
4. Due to inequality, exploitation of women is increasing.
5. Due to inequality the gap between the rich and the poor is increasing in the society.
6. Due to inequality the foundation of economic and social justice is getting weakened.
7. Due to inequality, the education of the deprived and exploited classes is lagging behind.
8. Due to inequality the level of education is falling because of educational inequality.

❖ **Deprivation:-**

- Deprivation means **to deprive , to keep separate or keep away**

- Keeping a block or family away from the basic elements of society (food, clothing, shelter, education) is called deprivation.
- Deprivation means that when a child or a family is deprived of their social , economic and educational needs while living in the society , it is called deprivation .
- Deprivation is the lack of necessary and neglected experiences and stimuli related to social , economic and cultural environment, as a result of which the child is unable to develop as desired. Deprivation means lack , devoid of, etc.

❖ Characteristics of a deprived child

1. The socio-economic level is low.
2. The cultural level is low.
3. There is lack of worldly knowledge.
4. The level of anxiety and fear is high.
5. He suffers from inferiority complex.
6. Suffers from negative self-perception.
7. The intellectual level is low.
8. Problem solving ability is not developed.
9. Memory is not sharp

Understanding the concept, types , factors and effects of power , dominance and resistance in society

❖ power in society

- meaning of power is- **power**
- Power in the simplest sense is the power to make decisions that influence the actions of others
- The word power usually means agreement or approval.

- of a person , group or institution to capture resources and ensure their use. When the struggle for dominance increases between many power centers , then there is a need for a center which establishes equality among all and this center is called ' power ' .
- Authority is such a word that when a person gets it, he has power (the power) comes
- Through power we use our authority and give guidelines to others and people are under us. I work in.
- ❖ **Many scholars have defined the meaning of power in the following manner-**
 1. **According to Byerstedt-** " Authority is the institutional right to use power , not power itself."
 2. **According to Beech-** "Power is the legitimate right to influence and direct the actions of others".
 3. **According to Rowe-** " Power is the right of an individual or a group of individuals to form political decisions and influence political behaviour".
- ❖ **Power is related to every aspect of human life**
 1. Power of the captain in the team
 2. father's power in the family
 3. party leader in political
 4. Power of the Principal in the school etc.
- ❖ **Types and Sources of Power**
 - Power classification is done on many bases. It can be divided into different parts from regional , administrative and political point of view.

- traditional power
- legal discretion or rational authority
- charismatic power

❖ **Traditional power** - This power is born out of the traditional power structure. When the subjects or subordinates follow the orders or commands of their rulers or superiors, then it is traditional power. Doing so becomes a tradition.

❖

❖ **Legal discretionary power** - The basis of this power is the political power of the ruler or administrative officer. In this, the position of the chair is respected.

- In this, administrative and political posts are used according to constitutional rules. A person is not above the law. The basis of this kind of power is the rule of law.

❖ **The charismatic power** When the public or subordinate employees obey the orders of their ruler or superiors because of their personal image, then that power is charismatic power.

- In this type of power, the orders of the senior are obeyed by being influenced by his personality. In this type of power, the followers are ready to do anything on the orders of their leader. For them, the words of the leader are like the words of the Vedas. This type of power is more effective in the field of religion and war.

❖ **Factors affecting power**

1. Political factors
2. social factors
3. economic factors
4. Constitutional Factors
5. Ideas and Values

❖ Factors affecting education

1. Admission in a good institute
2. Pressure to score good marks in exams
3. Appointment and Transfer of Teacher
4. impressing the interview
5. Hiring an unqualified person instead of a qualified student for a job

❖ Dominance means dominance

- When a group exerts political , economic, ideological or social influence on other groups, it is called dominance.

❖ Types of domestication 1 Military dominance 2. Economic dominance 3. Cultural dominance

1. **Military Supremacy** : Military supremacy is the main basis for maintaining dominance over any group of countries. If a country has high military power, then it can dominate any country on the basis of its power and strength.
2. **Economic Dominance**: Economic dominance means maintaining dominance in the world economy . If the economic condition of a country is strong then it can rule over any other country on the basis of its strong economy.
3. **Cultural Dominance**: Through cultural dominance a country can make its heritage , culture and civilization stronger than other countries.

❖ **Meaning of Resistance**

- Resistance means to take revenge or protest
- Resistance means to oppose and the protest is against injustice and injustice.
- Resistance is seen in different contexts but its meaning is taken as opposition only.
- and opposes them is called resistance.
- Resistance is not just about protesting and getting applause, but it is a process of raising voice against the unfair and immoral and making it just and moral.

❖ **-Types of resistance**

1. Based on the state
2. by region
3. On the basis of religion
4. On the basis of caste
5. Based on culture

❖ **Fundamental factors of resistance**

1. Separatist
2. Minority and Majority Institutions
3. Vachna
4. Inequality
5. no power no pressure
- 6.

Point -3 Concept of education for equity , equality and social justice, need and obstacles

❖ **Parity - Equality means equal status in the society**

- Equality is an ideal state , which implies equal status for everyone in the society.

- The general meaning of equality is to provide equal conditions to everyone, but it does not mean that everyone should be made the same.
- Giving equal salary to everyone, giving equal house to everyone , giving equal respect to everyone etc. are examples of equality.
- The condition of a society in which all the people of that society are equal is called equality.

❖ **Equality :-** - Equality literally means equal.

- 'Equality ' in general means balance and uniformity or ' equal in all respects'.
- As we say, everyone has equal right to education irrespective of caste , religion or gender . Law is same for all. Here the meaning is that it is same for all.
- Equality means equal treatment. The real meaning of equality is to give equal conditions to everyone. We cannot make everyone exactly the same, but equal conditions can be made. For education, all the people of the society, irrespective of their caste, religion or gender , have been given equal rights.
- "Everyone getting the same work is equality" and "Everyone getting the same conditions to get work is equality."

❖ **Difference between equality and parity**

Parity	Equality
(i) The meaning of ' equality ' is related to fairness and justice.	i) Equality means equal opportunity, equal access , equal treatment , equal sharing and division i.e. keeping everyone at equal level.
(ii) Equality = fairness + justice	

It is about making rational and justifiable decisions.	(ii) Equality = Equality (and nothing else) , 2=2 It is mainly about treating everyone equally regardless of whether they are rational or not.
(iii) Equity focuses on individual needs and requirements. Thus it is also known as need based approach.	(iii) Meaning of Equality: Ensuring that every individual gets equal opportunity to make the maximum use of his/her life and talents.
(iv) Equality is about giving people what they need .	(iv) Equality is not affected by the needs of people or society. Equality cannot fulfill all the needs and demands of the people.
(v) Equity can be termed as ' positive discrimination ' . It refers to proportional representation (by caste , sex , class, etc.) to achieve fair results.	(v) 'Equality ' may lead to negative discrimination. It does not follow proportionality in representation.
(vi) Equality is the means to achieve equality.	(vi) Equality is the outcome/end result/ultimate goal of the process.

❖ **social justice**

- **Social justice refers to the justice that is provided to members of all sections of society in the social system without any discrimination. It assures every person of getting a proper place in the society.**

- It inspires one to overcome whatever difficulties one faces in order to achieve the same level.

❖ **Need for Social Justice:**

1. There should be all-round development to give rights to every person
2. There should be no injustice done to anyone because anger arises when justice is not served.
3. There should be no discrimination between the rich and the poor because this increases the gap.
4. Fraternity, equality etc. can be promoted.
5. Social justice is necessary for everyone to develop ideal qualities in the society

Unit-2 Contemporary Issues in Education

Point-1 Modernization , globalization , social change and education

- ❖ **Modernization** – Modernization means developing a country through economic growth , technological advancement and expansion of infrastructure.
 - Modernization is a multidimensional process. It includes changes in all the areas through which man organizes his society; all his political , social , economic , intellectual , religious and psychological activities.
 - Modernization is a comprehensive process which includes increase in geographical and social mobility, spread of secular , scientific and technical education , importance of acquired status as compared to ascribed status , rise in standard of living and related matters.

- **Modernization means dynamism at every level of the society which includes change in the structure of society based on science and technology.**

❖ **Characteristics of modernization**

1. **Modernization is a system under which work is done to promote industry and urbanization.**
2. **Modernization leads to the growth of urbanization , nuclear family , equality , freedom and democratic values.**
3. **Modernization leads to opposition to ancient customs , traditions and values and acceptance of new ideas, which brings about changes in the social structure.**
4. **Modernization is not just a change in material culture, but it also means a change in ideal values , beliefs and lifestyle.**
5. **Modernization brings change in the society.**
6. **A better education system is developed in which an individual makes significant contributions in various fields like social , economic , political , technical etc.**
7. **Modernization brings about changes in the objectives of education , curriculum , teaching methods and roles of teachers.**
8. **The use of technology in education increases. This leads to technological development along with the development of scientific outlook and international goodwill among people.**

❖ **Disadvantages of modernization:**

1. **are increasing in society**
2. **Students are starting to ignore social values and traditions.**
3. **Due to modernization, students and society start ignoring the importance of their past.**
4. **Society seems to be ignoring traditional techniques and methods .**

5. Traditional ideals and values are being harmed

❖ Impact of modernization on education

- 1. improving the condition of schools**
- 2. Increase in the number of schools**
- 3. Rapid development of technology in school education**
- 4. Improving the teaching process**
- 5. Expansion of teaching method**

❖ Globalization – Globalization is the process by which all people in the world have become interconnected. It involves world politics , economics and culture. It has greatly raised the standard of living of people around the world. This means that the level of wealth , comfort , material goods and necessities of people in different countries has increased.

- **Globalization means connecting national , domestic economies with the world economy, that is, connecting the economy of a country with the economies of other countries of the world .**
- **Globalization is a process in which all the countries of the world are connected to each other socially, economically , politically and culturally. At present, the economy of the whole world is interconnected, which is a proper example of globalization.**
- **Through globalization , business activities expand globally. Along with this , their competitive capabilities also develop.**
- **Globalization is such a medium which binds all the nations together , so that they can solve their problems together.**
- **This has further increased the gap between the rich and the poor. This is the economic process in which the rich will become richer and the poor will become poorer.**

- is affecting every aspect of human life, economic, social , political , cultural and environmental aspects. It has both positive and negative effects.
- As a result of globalization, there has been a numerical increase in the field of higher education. Due to this, there has been a lot of change in the objectives and curriculum of education. Higher level educational institutions are being established.

❖ **The following are the features of globalisation :-**

1. Globalization is a growing effort towards one world and one state.
2. Globalization is the process of transforming cooperation , interdependence and mutual relations into practice
3. Globalization is a process of reducing distances.
4. Globalization is a process of bringing the economies of states closer.
5. This is such an activity whose nature is multifaceted like economic , social, cultural , intellectual and technical etc.

❖ **social change**

- , values, attitudes , beliefs and nature of the people living in the society. When there is a change in individuals, the society automatically changes. Because it affects the functioning of the society. Social change involves changes in social structure and working style.
- Education modifies the behaviour of an individual. When collective thoughts are changed through education, social change takes place.
- Education impacted the status , outlook , lifestyle , food habits and customs of individuals and it changed the nature of society.

- Education plays a positive role in social change
- Society is constantly changing. The ideals , needs , duties and values of society keep changing according to time and need. Society is a group of living individuals which is always dynamic in thoughts, values and activities. This mobility causes change. The following changes find place in social change.

(a) Change in social structure

(b) Change in social values

(c) Changes in social institutions

(d) Change in the lives of the members of the society

❖ **Role of teacher in social change -**

- The teacher plays an important role in social change. The first lesson of socialization is taught to the child at home , but after the parents, the teacher plays the most important role in the socialization of the child.

❖ **The role of a teacher in social change can be explained through the following points –**

1. Teachers preserve and transfer their culture with new values
2. The teacher can bring about social change by treating all children equally and without any discrimination.
3. The teacher accelerates social change by providing maximum independence to the children so that their personality can be fully developed.
4. The teacher should not differentiate between the children on the basis of their social and economic conditions.

5. plays an important role in social change through social , moral , cultural and democratic development of children .

Point - 2 Question of quality in education

- Quality education means such education which fulfills the objectives of its creation well. Education usually includes that education which understands the interest and abilities of students in teaching-learning and fulfills the needs of the society and makes students capable of earning a livelihood.
- Quality education aims to inculcate those qualities which help students to achieve the objectives of education well.
- When any work includes all the qualities (practical and theoretical) related to that work then it is seen and understood as the quality of the work. The same aspect is there in education also.

❖ For quality education, the school should have some facilities like

1. library , teaching learning material , material for children to play , excursions as well as playground etc. in the school building through which children can use all the resources to get quality education as well as make their future better.
2. Looking at the present quality of education, there is a lack of education even at the primary level, which is very important to improve
3. Through quality education, the intellectual, cognitive, spiritual, moral etc. aspects of children can be developed in a better way.

❖ Challenges related to quality in education

❖ Infrastructure related challenges

- Lack of school building
- Lack of toilets
- Lack of drinking water
- Lack of playgrounds and equipment
- Lack of a better environment

❖ Teacher Related Challenges

- Decrease in teacher student ratio
- multi classroom teaching
- lack of teacher quality
- lack of knowledge of the subject matter

❖ Learner Challenges

- poverty
- family feud
- Contaminated environment
- fear of punishment

❖ Curricular challenges

- cumbersome curriculum
- Lack of activity
- lack of connection to life
- lack of focus

Point – 3 Public education vs private education

❖ universal education

- **Maximum education means giving education to all the people living in the society without any discrimination**
- **Basic education means that education where compulsory education is given to children of all classes and which is run by the government. This education is provided free of cost to the children. There is no involvement of any private person in this and at the same time there is no discrimination of any kind in basic education.**
- **Highest education should be available in every state of our country through which even the poorest child can easily complete his studies as well as build a better future.**
- **Most of the development of children's intellectual, cognitive, spiritual, moral etc. aspects can be done in a better way through education.**

❖ private education

- **Private education means that education where education is given to children of all classes but it is not run by the government but it is run by a private business person in which that person is the complete owner of the high school and can do whatever he wants**
- **But in public schools, the decision is in the hands of the government. Whatever decision the government takes, it has to be implemented. But in private schools, the decision is in the hands of the private person. There is no involvement of the government in this.**

Point – 4 Privatisation of education

- Privatisation of education means that all the government schools and institutions will not be run by the government but will be in the hands of a private company whose supervision and management will be done by that private institution.
- Privatisation of education refers to the process of transferring educational activities or services that were formerly controlled or managed by the government but are now run and managed by a private entrepreneurial institution.

❖ advantages of privatisation in education

- Improving the quality of education
- Reconciliation of financial resources
- Solutions in Teacher Qualifications
- Eliminating unemployment
- Ending corruption

Point - 5 Education for the underprivileged and neglected class

- Education for the disadvantaged and neglected classes refers to those classes which have been denied access to education ; people of such classes are kept away from the general mainstream of education.
- It is a matter of deep thought that these people become victims of the evils of society and suffer from deprivation. Such people remain backward from the basic right of education.
- Education is very important for the underprivileged class , because every class has the right to education. If proper education is provided to these classes, it plays an important role in social change.

❖ The following people fall in the category of deprived children-

1. Children of Scheduled Castes and Scheduled Tribes
2. Children from backward classes and backward areas
3. Girls education of underprivileged class in India-
4. retarded and handicapped children
5. children from minority communities

POINT - 6 GENERAL SCHOOL SYSTEM

- , are provided education in the same school without any discrimination and are integrated with the mainstream of society.
- This is to ensure that children get their fundamental rights related to education equally and without any discrimination.
- Equal school system requires such a school which teaches to acquire education on the basis of merit, neither money nor status is involved in it, it works to provide proper and holistic education to children equally without any discrimination of caste, religion, gender or any other basis.

❖ Objectives of Common School System:-

1. To provide uniform crest for children of one age group.
2. To provide proper quality primary level education to all children.
3. To remove indifference towards government schools.
4. To eliminate discrimination prevalent in the society.
5. Providing opportunities for advancement through education to the underprivileged class

Unit-3 Political and Constitutional Context of Education

Point -1 State , democracy and education in the context of Indian Constitution

- ❖ **State :-** A state is an organized unit that is under a government. States can be sovereign. Apart from this, any government unit or its effect is also called a ' state ' .
- ❖ **essential elements of states** - Population, territory, government, sovereignty
- ❖ **The main duties of the state are the following:**
 1. The state and its duty are not to replace the individual and the family but to develop them
 2. It is the duty of the state to establish schools and help private schools
 3. It is the responsibility of the state to change the structure of schools according to the needs of society
 4. It is the state's responsibility to free education from local conflicts
 5. It is the responsibility of the state to pay special attention to preserve the culture of the nation
 6. It is the duty of the state to make proper arrangements for the education of teachers so that the level of education does not fall

➤ Educational function of the state or the state as an agency of education

1. Make arrangements for schools and formal education centres
2. Making education compulsory up to a certain level

3. to have general control and direction over the school system
4. Providing qualified teachers
5. Motivating parents for education of children
6. Promoting academic research
7. Bringing the family into closer contact with the school
8. Providing social training , cultural training , citizenship training , economic training
9. imparting political training
10. adult education system

➤ **Directive Principles of State Policy are described in Articles 37 to 51 of the Constitution**

1. All citizens, men and women, have equal right to an adequate means of livelihood
2. The economic system should be dynamic in such a way that the resources of wealth and production are beneficial to the common people
3. Both men and women should get equal pay for equal work
4. States should fully realise their economic potential and development
5. Children should be given opportunities and facilities for healthy development in a free and dynamic environment

- **Democracy :-** Democracy means rule of the people or rule of the people
- Democracy is a system of government under which the public can voluntarily choose their representative by voting for any candidate contesting the election and can make him a member of the legislature.
- Democracy is made up of two words , " Lok + Tantra". Lok means people and Tantra means governance

- **Basic principles of democracy- liberty , equality , fraternity , justice**

➤ **Education in a democracy**

1. In democracy education should be imparted in such a manner that the methods develop personal interest in social relations and control and such mental habits are developed in them that make it possible for social change to take place without creating chaos.
2. The main goal of education in a democracy is to ensure welfare of all people.
3. Education in a democracy respects fundamental freedoms in practice
4. In democracy education develops and utilizes the intelligence of the people and at the same time liberates them
5. Democracy education provides learning through experience

❖ **Objectives of democratic education**

- Development of individuals with well-developed personalities
- development of personal interests
- Formation of good habits
- Development of social attitudes
- Development of democratic values
- Growth of political consciousness
- Development of the Lead Gun
- Developing democratic citizenship

❖ **what is education**

- ' shiksha ' is formed by adding the suffix ' a ' to the Sanskrit root ' shiksha ' . ' Shiksha ' means learning and teaching. The word ' shiksha ' means the act of learning and teaching.

❖ Importance of education

- Education we Education is a necessary tool for everyone's bright future. We can achieve anything in life by using this tool of education. Higher level of education helps people to gain social and family respect and create a different identity. Education time is a very important time for everyone socially and personally.

❖ The purpose of education

- Education creates good thoughts in a person .
- It paves the way for human life.
- The role of a well-educated citizen is important in building a better society.
- Humans have the power to think, so they are superior to all living creatures, but the thinking of an uneducated person is like that of an animal.

Point – 2 Universalisation of Education

- Education Universalisation of education means
- Universalisation of education means access to elementary education to children between the ages of 6 and 14 from all sections of society without any discrimination.
- Boys and girls from all sections of society should be able to get compulsory and free education from class 1 to 8.
- Everyone should be enrolled. All enrolled children should come to school daily. Their stay there should be ensured and the achievement level of all should also increase. They should get free and compulsory education of satisfactory quality. For this,

things like universal access , 100% enrollment , 100% retention and attainment of 100% learning achievement are necessary.

- Universalization of education will help us in creating capable patriotic citizens , so that they can abandon their personal vested interests and move towards national unity and integrity. yes will be able to

❖ Objectives of Universalisation of Education

1. purpose of learning
2. The purpose of intellectual and mental development
3. The purpose of physical development
4. The purpose of moral and character trust
5. The aim of cultural development
6. The aim is to develop social skills
7. The aim is to ensure all-round development of personality
8. purpose of earning a living

❖ The need for universalisation of education

1. essential for spreading literacy
2. necessary to fulfil the needs
3. Essentials for self-education
4. essential for individual development
5. essential for the success of democracy
6. essential for political awareness
7. Helpful in fostering a sense of social equality and social justice
8. essential for the destruction of communalism

❖ Barriers to universalisation of education

- It would be necessary to discuss the main obstacles that arise in the path of universalization. These obstacles are as follows
1. Non availability of institutions
 2. Decrease in the quality of education

3. Family environment and poverty
4. Gender discrimination and physical disability
5. Inequality in social status
6. linguistic difficulty
7. curriculum and infrastructure
8. Lack of motivation , and lack of favorable environment.

Point – 4 Children and the right to education

- In a democratic country like India, many provisions have been made for the education of children which improve the conditions of education in any democratic society and ensure access to education to all.

❖ Fundamental rights and education-

1. Equality was the right to equality (Articles 14 to 18)
 2. Right to Freedom (Articles 19 – 21)
 3. Right against exploitation (Articles 23-24)
 4. Right to freedom of religion (Articles 25 to 28)
 5. Cultural and Educational Rights (Articles 29 to 30)
 6. Right to Constitutional Remedies (Article 32)
-
- I. **Article 14-** The State shall not deny to any person equality before the law or the equal protection of the laws within the Indian jurisdiction."
 - II. **Article 15-** The state shall not discriminate against any citizen on grounds only of religion , race , caste , sex or place of birth or any of them. This ensures equality in educational opportunities in India.
 - III. **Article 15(4)-** It empowers the government to make special provisions for the advancement of backward classes including Scheduled Castes and Scheduled Tribes. It also ensures

reservation in educational institutions for Scheduled Castes and Scheduled Tribes.

- IV. **Article 16(1)**- It guarantees equal opportunity to all citizens of India in matters relating to employment or appointment to any office under the State.
- V. **Article 16(4)**- Empowers the State to make special provisions for reservation of appointments in favour of any backward class of citizens which is not adequately represented in the services under the State .
- VI. **Article 21(a)**- To make provision for providing free and compulsory education to all children of the age of six to fourteen years in the state. It was inserted by the 86th Constitutional Amendment 2002.
- VII. **Article 24**- No child below the age of 14 years shall be employed in any industry , mining or other hazardous work.
- VIII. **Article 28**- Institutions run by the State shall not impart any religious preaching or religious education , although institutions run by any judicial or religious institution are permitted to provide religious education.
- IX. **Article 29(1)**- Under this, it is provided that any class of citizens residing in the territory of ' India ' or any part thereof will have the right to preserve its specific language , script or culture.
- X. **Article 29(3)**- Under this, it is provided that no citizen shall be denied admission into any educational institution run by the Government or aided by the Government on the grounds of religion , race , caste , language or any of them.
- XI. **Article 30(1)**- According to this, all minority groups based on religion or language have the right to establish and run educational institutions of their choice.
- XII. **Article 30(2)** According to the Act the State shall not discriminate against educational institutions run by minority

communities on the basis of religion or language in the matter of grants-in-aid.

XIII. Article 45 – The State shall provide free and compulsory education to all children up to the age of 14 years within ten years from the commencement of the Constitution.

❖ **Right to Education Act 2009**

- RTE) was implemented in 2010 to provide free and compulsory education to children in the country. In which it has been said to provide compulsory and free education to all the children of the state and country who are 6-14 years old .
- Right to Education Act 2009 : The Parliament of India enacted this Act on 4 August 2009 , which came into force throughout the country from 1 April 2010 . In which it was said that all the children of the state and country who are 6-14 years old will be given compulsory and free education. Is.

❖ **Objective of Sarva Shiksha Abhiyan: -**

1. To bring all unenrolled children in the age group of 6 to 14 years to school by 2003.
2. Universalisation means ensuring access to elementary education from classes 1 to 8 for all children in the age group of 6 to 14 years by 2010.
3. To arrange alternative education for school-less settlements and hamlets.
4. By making school attractive and teaching methods enjoyable, we should take the students out of school
5. To orient the living children towards schools.
6. To provide satisfactory and quality education for a good life
7. To create conditions for community-led school management and monitoring

8. To bring about all-round development of the school in a meaningful partnership between teachers and community.

❖ **Objectives of the Right to Education Act ,**

1. To promote education by providing free text books, uniforms and scholarships to children .
2. To spread education to rural areas.
3. To improve the level of good education in the country.
4. To encourage expenditure on education of children.
5. Pay special attention to the education of girls.
6. Making primary education accessible to all and universalizing it.
7. To provide basic education to all children between 6 to 14 years of age in the country.

Point- 5 National development and education

- Education plays the most important role in promoting national development. Its aim is to prepare citizens full of nationalist sentiments , who are capable of knowledge , skills and intelligence.
- The feeling of nationalism binds the citizens of the country in the thread of unity. It paves the way for the individual to sacrifice his own well-being for the good of the nation.
- Education plays its role in developing the sense of nationalism among the citizens of a country and in accumulating and preparing them as national resources.
- Education helps in the economic progress of the nation as well as its intellectual development.
- According to the famous educationist Swami Vivekananda, "The pace of development of any nation depends on the spread of education among its citizens."

Unit-4 Education and Social Expectations

Point - 1 Impact of contemporary changes on education , school and community expectations

❖ **Education:-** The word education is derived from the Sanskrit word “ shiksha ” and suffix “ aa ” which means the process of learning and teaching.

- In a broad sense, education is a continuous social process in a society through which the innate powers of a person are developed, their knowledge and skills are increased and their behavior is changed.

➤ Specialty of education

- The main feature of education is that it is a continuous process which continues from birth to death
- Education is not limited to educational institutions but is included in all areas of life and it can be acquired at any place. Education is a conscious ongoing process.

➤ Importance of teacher

- Assistance in meeting needs
- attainment of business skills
- development of the personal
- National Development
- Character development
- all round development
- Preparing for life
- social reform that progress

➤ Society's expectations from education: -

1. Moral development of the individual and development of a sense of responsibility

2. To impart knowledge about the culture of society to the new generation
3. To socialize children by introducing them to social rules.
4. To develop understanding of rights and duties among the citizens
5. To develop a liberal outlook towards different beliefs and religions of the society
6. To develop a sense of loyalty towards society.
7. To generate a feeling of resolving social problems.

➤ **School:-** Vidyalaya is made up of two words Vidya + Aalaya which means temple of knowledge

- School is a special environment where education of certain activities and occupations of life is given with the objective of developing the child in the desired direction.

➤ **Speciality of the school**

1. School is a special environment in which special qualities, activities and arrangements are made for the mental development of children.
2. School is established to prepare children for their future life
3. All-round development of boys and girls is done in the school
4. All-round development of personality is done in school
5. Social values are developed in schools.
6. Ethical business, citizenship etc. are developed in school

➤ **The impact of the community on the school**

1. The effect of the economic conditions of the community
2. Influence of political conditions of the community
3. Effect of defect on Guna of community

4. Influence of ideals, beliefs and needs of the community

➤ Impact of the school on the community

- 1. Preservation of the cultural heritage of the community**
- 2. Meeting the needs and demands of the community**
- 3. Determine the sister nature of the community**
- 4. Industrial progress of the community's vocation**
- 5. Continuous efforts for community development**

➤ **community:-** In common spoken language, ' community ' is a group of people who live together in a definite area to achieve a common purpose and lead a common life. Therefore, for the formation of a community, it is essential to have common interests , definite area , common standard of living and a sense of unity.

- **A community is a group of people who live together and exercise their rights by serving each other**
- **A place where more than one family and people of any caste live together is called a community**

➤ Characteristics of the community

- 1. There must be at least 2 people in the community**
- 2. The community has a definite geographical area which may be small or large**
- 3. It can start from a small perimeter and become wider**
- 4. Or there are both permanent and temporary groups of humans**
- 5. Family, religion, neighbourhood, state and nation are different forms of community**

❖ school and community relationship

- **There is a close relationship between school and community. Both are dependent on each other for their progress and stability.**
- **School is a social institution. To keep itself alive, society establishes various types of educational institutions through which the thoughts , beliefs , ideals , activities , norms and traditions of the society can be passed on to the coming generations.**
- **School has a great impact on the life and progress of the community. The school guides the community through its thoughts and actions and leads it towards progress.**
- **The community provides the school with primary knowledge of the real conditions of life. In this way both keep helping each other.**

Point - 2 Learner institutions: as agents of reconstruction in social change

- **Educational institutions means school, coaching or any other educational institution where children are educated. As you all know that through education we can bring about social change and at the same time we can add new things as an agency of reconstruction. So our endeavour should be that educational institutions should be better so that education and social welfare can be further improved.**
- **Education plays an important role in social mobility. By getting educated, you can improve the financial condition of your family.**
- **By achieving a higher position and increasing the social prestige of the family, you can save your family and society from exploitation and corruption.**

- After getting education, playing a significant role in the building of the nation by getting married in a family of good socio-economic status due to getting a good job or source of income, improving their social status, all these conditions are indicative of social change.

Point - 3 Impact of economic reforms on education

- **Economic development:** It is clear from their purpose and need of education that education plays a major role in the economic development of any country.
 1. Revolution can be brought about in the technical field through education and the main impact of technical revolution is on the production capacity of the country
 2. Teachers open new paths in rural areas; villagers increase their production using agricultural knowledge
 3. Education enhances the human resources of law by increasing the efficiency of workers
 4. Education paves the way for economic progress by making good use of natural resources
 5. Through education, we can develop our country and ourselves by using new technologies.

Point - 4 Education and medium language

- The meaning of education and medium language is that with the present time we can see the inclination of the society towards English as the medium of education but in our country the language of education has been given to the mother tongue.
- At the same time, the question of expansion and prestige of Indian languages also arises. This is the reason that proper education system has become a joke. To end this joke, it is

necessary that proper education system should be changed and a public secondary school should be decided to provide it. Only by doing this, the welfare of the learner and the nation can be possible.

- In the words of the Katori Commission, the language problem has been the most complex problem among all the problems faced by our country since independence and still remains so.
- There have been and still are two main reasons for the complexities of the language problem in independent India. The first reason is that according to the 1971 census, there are 16 to 92 mother tongues and 380 dialects in India, out of which only 15 have been given a place in the Indian Constitution. The second reason is that there has always been a difference of opinion among the country's educationists and politicians about a common language.

Point - 4 Education for innovation and development in society

- Innovation is a combination of 2 words = Nav – new, Achar – change in conduct
- Innovation means a new and special change that is done deliberately and which is considered economically more effective than other methods of achieving a result.
- Innovation means change in the rules, laws, civilization and culture of society as well as change in the process of teaching and learning in education.

❖ Characteristics of innovation

1. Innovation is an idea that is considered new.
2. Some or the other speciality is definitely found in innovation.
3. Innovation is an effortful task.

4. Innovation is used deliberately. It is done keeping its utility in mind.

5. Innovation is considered better or more advanced keeping in mind its qualities compared to the prevailing methods

❖ The process of innovation

1 Information 2 Curiosity 3 Test 4 Evaluation 5 Acknowledgement

❖ The importance of educational innovation

1. By using ideas, dynamism can be brought in the process of teaching and learning
2. Innovation is also used in the teacher diary through which the learning of students can be assessed by writing hints.
3. Innovation is also necessary for reading thought provoking news headlines by students at the scene of incident
4. Educational technology can be brought to the school through wall news educational innovations
5. Educational innovation is mainly related to influencing the teaching learning process and making it interesting .

Unit -5 School and Education Policies Education in the Context of Contemporary Society

Point - 1 Development of school education in historical and contemporary policy context

❖ School

- Vidyalaya is made up of two words Vidya + Aalaya which means a place where one acquires education and knowledge .
- School is an environment where certain qualities of life and certain types of activities and vocational education are given with the aim that the child develops in the desired direction.

what should be in school

1. **Hostel Building Playgrounds**
2. **Class system**
3. **Laboratory**
4. **Garden**
5. **water system**
6. **bicycle stand and**
7. **toilet**
8. **Assembly hall is better**
9. **Class Room**

❖ Characteristics of a good school building

1. **Adequate space for school**
2. **Scientifically designed**
3. **Protecting school building from accidents**
4. **decoration of school building**
5. **The environment of the school building should be better**
6. **school zone safety**
7. **environmental health and cleanliness**

❖ construction of school building

1. **Foundation -** Neem has a special importance in the construction of any building because the whole school or the entire building rests on its foundation.
2. **Walls :-** The walls of the building should be made of brick and stone and the width of the wall of the building should be at least 14 inches. If a large building is to be built, then the width of the bottom wall should be 18 inches.
3. **Furs :-** The structure of the school building must be strong and smooth so that it lasts longer and everything can work well.

4. **Floors of the school-** In Raipur, he said that the school building should be of one floor only because it helps the headmaster to inspect all the activities of the school.
5. **Class size :-** The size of the class depends on the number of students but the class size should be large enough to accommodate at least 40 students comfortably
6. **Entrance Gate :-** There should be so many entrances in the building that the school building can be vacated in 4 minutes. There should be at least 2 main entrances.
7. **lighting arrangement :-** There should be sufficient number of skylights and windows in the classroom so that there is sufficient light in the classroom
8. There should be provision for bicycle stand, drinking water and canteen in the school
9. There should be provision of land and playground in the school

❖ **Types of schools**

➤ School education is divided into four parts

1. Primary School
2. Upper Primary School
3. Secondary School ,
4. Higher Secondary School

- ❖ **Primary School:-** Primary school provides education from class 1 to class 5
- ❖ **Upper Primary School:-** The schools which provide education from class 6 to 8 are called upper primary schools.
- ❖ **Secondary School:-** Secondary school provides education from class 9 to 10th
- ❖ **Higher Secondary School:-** Higher Secondary School provides education from class 11th to 12th

Point :- 3 Teachers and Education Policies

❖ National Curriculum Framework 2005

- **National Curriculum Framework 2005 means to prepare and determine the curriculum for primary and secondary level education.**
- **To prepare NCF-2005, a Steering Committee under the chairmanship of Professor Yashpal and 21 national groups were formed and implemented in 2005 AD**

❖ Five Core Principles of NCF-2005

- 1. Relating school knowledge to life outside**
- 2. Education should be completely free from the rote system**
- 3. The curriculum should be such that it leads to all-round development of the child**
- 4. Exams should be made more flexible and integrated with classroom activities**
- 5. Development of a regional identity that accommodates national concerns within a democratic polity**

❖ Bihar Curriculum Framework 2008

- **the National Curriculum Framework 2005 and Bihar Curriculum Framework 2008 , the children's native language or their mother tongue is considered the strongest basis for their learning. It is a valid principle of pedagogy that children should be educated through their mother tongue because multilingualism is the identity of Bihar's geography.**
- **This is a research done by Bihar to run the education curriculum of its own state separately and according to its own will. In this, by making some changes in their education, they have made a separate curriculum keeping in mind the community and society of their grandmother's children, which we know as BCF 2008.**

❖ Principles of BCF 2008

1. Education related to nature, society and life outside the schools
2. Redesigning textbooks and teacher learning strategies to promote a creative and critical approach
3. Correcting class and exam questions to aid the learning process
4. All-round development and helping children realize their individual potential
5. To nurture children to grow as responsible and conscientious citizens with a social responsibility

❖ Syllabus

- The main function of the school is to provide education to the children and whatever is done there to fulfil this is called curriculum.
- A systematic and easily accessible list of the subject matter and related material prescribed for such education or training is called a curriculum.

- ❖ **Curriculum:** - Curriculum is a broad term which includes the internal and external activities of the school. It includes all the experiences which the students get in their school life, whether they are honored or not, whether they are organized inside or outside the classroom.

- ❖ **Text Book :-** It acts as a guide for the teacher and thereby develops a self-study system in the student.

❖ Importance of curriculum in the process of education

1. The process of education is systematic

2. Children's psychological needs are fulfilled

3. Creation of text objects is possible

4. Evaluation is as simple as possible

5. Achievement of objectives is possible

6. Time and energy are utilized properly

❖ **Evaluation :-** Evaluation is made up of two words, value plus marking. It is the Hindi version of the English word Evaluation

➤ **Assessment** is a process through which we get information about the level of knowledge acquired by a student

❖ **Need and importance of assessment**

1. Measuring the efficiency and success of teachers

2. To check the behavioral changes in children

3. Identifying learning difficulties in children

4. Identifying different categories of children

5. Harassing children to learn better

6. Checking text books and making neglected corrections in them

7. To improve and develop the teaching process
